Warranty- Identification conditions

- ◆ Bar-code provided necessary
- ◆ Photos or videos provided necessary
- ◆ Return defect samples for final approval if necessary

- ◆ The purchaser is granted a limited warranty covering the safe and reliable function of the Force garage door opener for a period of 3years* from the date of purchase the warranty period.
- ◆ With the door fully open, push your garage door opener's transmitter or wall button to close the door. As the door is closing, hold up the bottom of the door with your hands outstretched and stiff. If the door does not easily reverse and continues to close, pull your hands away immediately. The closing force is excessive and the door should be serviced by a trained service technician.
- ◆ Monthly door balance test. If your door is equipped with an automatic opener system: close the door and disconnect the automatic opener. Once you are able to lift the door manually: Lift the door. It should lift smoothly with little resistance and should remain fully open. If it is difficult to open or does not remain open, the door may be out of balance and should be serviced by a trained service technician.
